Are Australian energy markets functioning efficiently?

As energy demand in Australia drops, prices continue to rise - important questions need to be raised. Why are demand trends changing? Is there appropriate investment in the network? Are the right energy market mechanisms in place?

Andrew Reeves, Chair of the Australian Energy Regulator, will outline what regulatory agencies are doing to address the problem. Tony Wood will compare these measures with those recommended in the recent Grattan Report Putting the customer back in front.

This Energy Futures Seminar is hosted in partnership with University of New South Wales’ Australian Energy Research Institute (AERI).

Chair
Prof Mary O’Kane
Chief Scientist & Engineer
New South Wales

Speaker
Mr Andrew Reeves
Chair
Australian Energy Regulator

Panel
Mr Tony Wood
Energy Program Director
Grattan Institute

Prof Mike Sandiford
Director
Melbourne Energy Institute

Dr Iain MacGill
Joint Director (Engineering)
Centre for Energy and Environmental Markets
University of New South Wales

Date
Monday 22 April 2013
6.30-8.00 pm

Venue
Leighton Hall
Scientia Building G19,
The University of NSW
Sydney, NSW 2052
