

Sydney Renewable Power Company

Presentation to
Financing Green Transformations
29 April 2015

Globally, community energy is growing

... and it could have real impact here in AU.

There are environmental benefits ...

... infrastructure benefits ...

... and social benefits.

Community energy is emerging here in AU ...

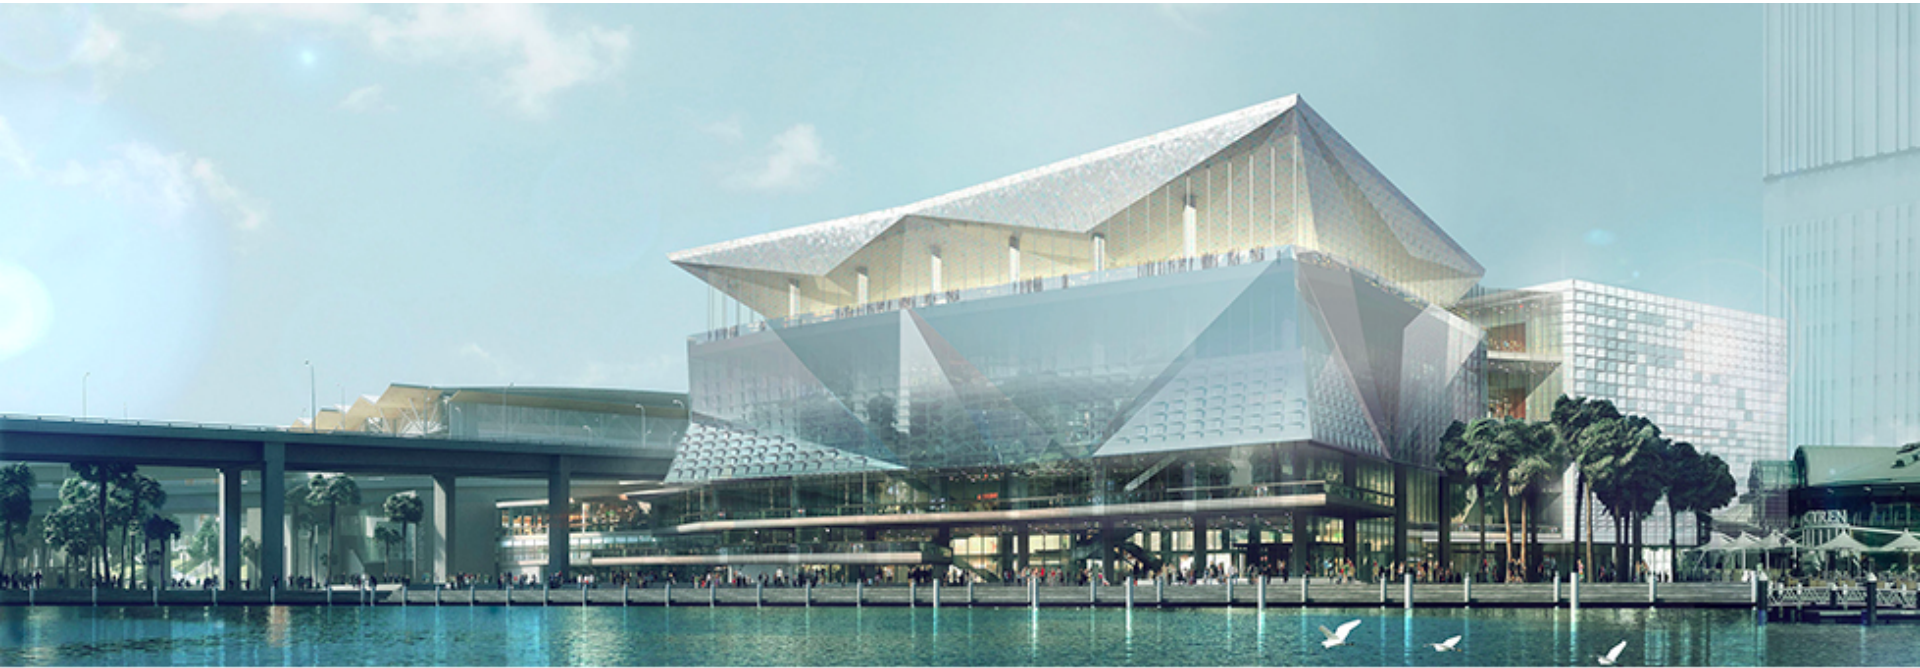

... so we think the time is right for the Sydney Renewable Power Company

Here's our team ...

... and our first project: 400kW at Darling Harbour

How does it work for investors?

- Share offering in 2015
- Our expected returns of 4-5% are underpinned by a 25-year contract
- An opportunity to diversify your portfolio and access the growing renewable energy sector
- A way to directly align your investments with your views on climate change
